SIGNING CHECKS

Mr. Schwartz was the oldest of seven children, so he had to quit school and work to help support his younger brothers and sisters. He never learned to read, so when he married and started a checking account, he signed his checks simply "XX". Eventually he started his own business, which immediately prospered. He soon was a very rich man.

One day, he got a call from his bank. "Mr. Schwartz," said the banker, "I need to ask you about this check. We weren't sure you had really signed it. All these years you've been signing your checks 'XX', but we just got one that was signed with three XXX's..."

Mr. Schwartz answered, "No problem, my friend. It's just that since I've become so wealthy, my wife thought I ought to have a middle name."

A HAPPY FAMILY

Boy was introducing, "Hi, my father's name is "Laughing" and my mother's name is "Smiling".

Girl was surprised, "Really? You must be Kidding!"

Boy defended, "No, no, that's my brother's name. I am 'JOKING'."

NEVER BE RUDE TO ANYONE

An American tourist asked a boat guy in Zanzibar, "Do you know Biology, Psychology, Geography, Geology or Criminology?"

The boat guy said, "No. I don't know any of these."

The tourist then said, "What the hell do you know on the face of this Earth? You will die of illiteracy!"

The boat guy said nothing. After a while the boat developed a fault and started sinking. The boatman then asked the tourist, "Do you know Swimology and Escapology from Crocodiology?"

The tourist said, "No!"

The boat guy replied, "Well, today you will Drownology and Crocodiology will eat you. I will not Helpology and you will Dieology because of your Badmouthology."

Dr. Good and Dr. Bad

SITUATION: A 56-year-old female with type 2 diabetes who often complained of sleep disturbance recently mentioned fatigue and numbness in feet.

DR. BAD

DR. GOOD

SLEEP DISTURBANCE IS NOT RELATED TO FATIGUE AND NUMBNESS

IT IS RELATED TO BOTH THE CONDITIONS

LESSON: A cross-sectional study suggested that diabetes-related symptoms, including neuropathic pain and fatigue, are strongly related to sleep disturbance and sleep-related impairment in adults with type 2 diabetes, underscoring the need to include detailed assessments of neuropathic pain and fatigue when evaluating sleep.
