RICE PREFERENCE

The young woman really thought she'd been very patient, through a protracted period of dating with no talk of marriage. One night her steady boyfriend took her to a Chinese restaurant. A MATHEMATICIAN, A PHYSICIST AND AN ENGINEER

A mathematician, a physicist and an engineer were traveling through Scotland when they saw a black sheep through the window of the train.

"Aha," says the engineer, "I see that Scottish sheep are black."

"Hmm," says the physicist, "You mean that some Scottish sheep are black."

"No," says the mathematician, "All we know is that there is at least one sheep in Scotland, and that at least one side of that one sheep is black!"

DIET RULES FOR CHEATERS

- Movie related foods do not have additional calories because they are part of the entertainment package and not part of one's personal fuel.
- Cookie pieces contain no fat—the process of breaking causes fat leakage.
- Things licked off knives and spoons have no calories if you are in the process of preparing something. Examples are peanut butter on a knife making a sandwich and ice cream on a spoon making a sundae.

- Foods that have the same color have the same number of calories. Examples are: spinach and pistachio ice cream; mushrooms and white chocolate. *Note:* Chocolate is a universal color and may be substituted for any other food color.
- Foods that are frozen have no calories because calories are units of heat. Examples are ice cream, frozen pies and Popsicles.
